

20kW outdoor telecom cabinet in democratic republic of congo

What is the telecommunications industry like in the DRC?

The telecommunications industry has not yet reached all potential consumers and has room to grow. Mobile telephones have a 44 percent penetration rate; internet penetration is approximately 3 percent of the total population. The DRC has not yet reached 5G and is still developing its 3G/4G network.

What will the DRC do in 2050?

By 2050, the goal is to have more than 50 percent of households using fiber optics and more than 90 percent able to connect to the internet via mobile phone. The DRC will have to develop its robotics market (digital technology) and become an important market for phones, software, video games and 3D technology.

What is a good prospect market for DRC?

The DRC will have to develop its robotics market (digital technology) and become an important market for phones, software, video games and 3D technology. E-commerce is also expected to grow significantly. This is a best prospect industry sector for this country. Includes a market overview and trade data.

Does the DRC have a 5G network?

The DRC has not yet reached 5G and is still developing its 3G/4G network. The low penetration rate leaves plenty of potential for development of higher-speed networks and linking the DRC to submarine cables linked to Europe.
