

350kW Microgrid Outdoor Cabinet for Railway Station

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications.

We offer dedicated enclosures, cabinets and storage for switchgear, data communications, power supplies, signalling systems and tunnel safety. Our range is fully compliant and network rail approved.

This study confirms the technical feasibility and strategic benefits of a hydrogen-enabled microgrid to power a switch-point heating system at a rural, non-electrified railway station in Austria.

The product is an all-in-one microgrid ready battery energy storage system, tightly integrating batteries, BMS, PCS, air conditioning, and fire protection systems.

Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.

From hybrid grid stabilization plants to renewable microgrids, our cutting-edge solutions are enabling reliable, efficient, and clean energy for diverse applications.

Advanced Microgrid Controls support multiple configurations and design implementation solutions to adapt to your evolving microgrid requirements. With a single interface, this control supports a truly ...

This product integrates a power conversion system (PCS), batteries, a battery management system (BMS), thermal management, power distribution, and fire protection, adopts single-serial design, and ...
