

Are solar panels a scam?

Solar panels themselves are not a scam. When the sun shines on solar panels, they produce electricity that can be used to power appliances and devices in your home. Making your own solar energy this way saves you money on your utility bills. That's not to say solar panel scams aren't real--just that the technology itself is not the problem.

What are the most common solar scams?

One of the most prevalent solar scams involves misleading lease agreements or power purchase agreements (PPAs). While these financing options are legitimate ways to access solar energy, unethical companies may misrepresent the terms or benefits of these agreements.

Is going solar free?

While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll cost to get and install solar panels. Here's how to steer clear of the scams.

How do you know if a solar company is legit?

Check the company's reviews on the Better Business Bureau website and verify that installers are certified by the North American Board of Certified Energy Practitioners (NABCEP). Also, research the company's online presence and ask for detailed quotes and contract information. Are offers for "free solar panels" legitimate?

Legitimate solar panels often utilize high-quality tempered glass, enhancing durability, while counterfeit versions might utilize thinner, lower-quality glass which adversely affects resilience. ...
