

Are you tired of working on photovoltaic panels

In this article, you'll learn about hard and soft solar installer skills, how to improve these skills and how to highlight them during your job search.

End-of-life management for photovoltaics (PV) refers to the processes that occur when solar panels and other components of a PV system (racking, inverters, etc.) are retired from operation.

I work primarily in life insurance, but I've recently become part owner of a solar business (launched this year), working with and selling on behalf of a few manufacturers.

What Is Your Typical Day like? What Kind of Training Brought You to Your Role? What's The More Rewarding Part of Your Work? What Are You Most Proud of Doing in Your Work So Far? What Would Surprise People Most About Your Work? What Is Next For You in Your Career Path? When people think about solar power, they think about the solar panel on their roofs. But while a house may have solar panels that each produce less than 1 megawatt (1 megawatt is enough to power 160 homes), I work on a fleet of utility-scale solar panels that each produce anywhere from 2 to 140 megawatts. See more on [getintoenergy](#).
