

The HJ-SG-R01 is designed to integrate multiple green energy sources such as solar, wind power, and diesel generators. This makes it ideal for remote areas in Australia where grid connectivity is limited.

Our custom-built, trailer-mounted, multi-panel folding solar power solutions are perfect for instant communications on a greenfield site and a versatile way of expanding a network or avoiding radio ...

AVID's solar design, installation, commissioning and monitoring services are operated by our teams of skilled engineers and qualified electricians. AVID's experience, versatility, scope of services and ...

Our mobile series is a communications infrastructure solution designed to be transportable and towed by a light vehicle using any tow hitch required. The solution utilises solar panels and are designed to ...

We specialize in the hire and sale of advanced solar communication trailers and lighting plants, supporting various industries with reliable and efficient communication infrastructure.

ICS Industries' range of Solar Skids provides a reliable and efficient transportable solution, including the capacity to provide solar power with battery backup, provision for an extendable mast, and outdoor ...

At Modbox, we design and build shipping container solar solutions to securely house your solar panels, batteries, inverters, and other equipment. Whether you're powering a remote worksite, an off-grid ...

The solution adopts new energy (wind and diesel energy storage) technology to provide a reliable guarantee for the stable operation of communication base stations.

Working with our US defence fabrication partner and power electronics contractors, we've created a Mobile Solar Communications solution with the power budget and performance reliability to support ...

We engineer bespoke communication trailers tailored to clients' specific requirements. Our engineering design process includes: Determining mast height for optimal RF coverage. Calculating power needs ...
