

Australian wind solar and energy storage projects

State-owned gentailer Synergy is seeking planning approval for the 2 GW Tathra renewable energy project that is to combine up to 500 MW of solar alongside 1 GW of wind capacity ...

Meanwhile, pumped hydro projects are also playing a vital role. The Kidston project in Queensland, for instance, recently became the first pumped hydro facility to be registered in ...

The development marks a decisive shift away from fossil fuels and highlights the growing maturity of Australia's solar, wind, and energy storage sectors. According to data from the National ...

Here we provide a snapshot of renewable energy projects that are under development around the country which will soon be feeding clean, low-cost energy into the Australian electricity market.

Discover 10 major renewable energy projects in Australia, including wind, solar and battery storage, and the job opportunities shaping the clean energy sector.

Australia's latest CIS Tender 4 has delivered a landmark set of 20 clean energy projects, totaling to a massive 6.6 GW of renewable capacity and 11.4 GWh of battery storage. These are ...

Of these 20 projects, 12 are hybrid schemes that combine battery storage with wind or solar generation, contributing more than 3,500MW of capacity.

Renewables like wind and solar help reduce Australia's carbon footprint by displacing fossil fuels. When battery systems store and release clean energy, the grid relies less on coal or gas ...

Discover Octopus Australia's renewable energy projects in solar, wind and battery storage, delivering clean power and lasting benefits for local communities.

Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation reaching 1,699MW average output while...
