

# Can solar energy generate electricity for heating

The short answer is yes, solar panels can heat a house. But the "how" is more interesting than a simple yes or no. It involves two distinct technologies with different price tags and efficiencies.

You can't take an element from the Canva library (e.g. photo, illustration, etc.), put it on a t-shirt, and sell it. This isn't a "design" and would amount to re-selling someone else's content. This applies whether ...

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.
