Constant Temperature and Humidity Type Power Cabinet for Microgrids

The SIMN XHH Series represents the pinnacle of precision environmental control technology, combining advanced temperature regulation with intelligent humidity management in a compact cabinet design.

With their highly efficient refrigeration system and outstanding thermal insulation, constant climate cabinets are ideal for use in laboratories and research facilities. They offer a wide ...

Designed to meet the demanding requirements for precise humidity and stability, Advanced engineered design incorporates the latest in cabinet, refrigeration, temperature control and monitoring features.

The ARC Pro Cabinet is the most capable and durable hardware option for the ARC microgrid control solution. The ARC Pro includes an active cooling system that allows for installation in more extreme ...

The humidity inside the cabinet exceeds the limit, the constant humidity module is activated, and the humidifying pad is activated, with a lifespan of more than 5 years

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other ...

Our climate controlled storage cabinets deliver stable temperature and humidity, so rubber, polymer, and composite materials age slower, inspections pass more often, and field crews stay ready.

Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.

The SFQ Micro Grid PV Storage Cabinet SCESS-T 500KW/1075KWH/A is a high-performance storage system that prioritizes safety and reliability.

Our Constant Climate Cabinet (Desk-top Temperature & Humidity Chamber), which supports temperature and humidity tests in laboratories and research rooms using a network.
