

Our rundown of the countries around the world using the most solar energy, from Mexico to China

Solar power is rising fast as countries aim to reduce pollution and switch to renewable energy sources. The top 10 solar power nations are setting global examples by using sunlight to ...

Solar power is the fastest-growing renewable energy source globally, with China being the leader in solar energy usage at 306,973 MW total capacity. However, solar power accounts for only ...

Discover the top countries with the most solar power installed in 2025. Explore global solar growth trends, annual installation rates, and how nations are embracing clean, renewable ...

Overview Global use figures Africa Asia Europe North America Oceania South America Many countries and territories have installed significant solar power capacity into their electrical grids to supplement or provide an alternative to conventional energy sources. Solar power plants use one of two technologies: o Photovoltaic (PV) systems use solar panels, either on rooftops or in ground-mounted solar farms, converting sunlight directly into electric power.

The worldwide growth of photovoltaics is extremely dynamic and varies strongly by country. In April 2022, the total global solar power capacity reached 1 TW, increasing to 2 TW in 2024. The top ...

Solar energy capacity is growing rapidly, driving the global transition to renewable energy. This graphic visualizes the top 15 countries by cumulative megawatts of installed ...

This report will highlight the top 40 countries at the forefront of solar energy adoption, showcasing their efforts to combat climate change. Notably, China is currently leading the way in ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

The top five countries are China, United States, India, Japan, and Germany, based on solar power generation and installed capacity. Emerging leaders include Brazil, Australia, and Spain, ...

Data from BP's Statistical Review of World Energy 2022 and the International Energy Agency's solar energy statistics reveal the countries that are at the forefront of global solar power capacity and ...
