

Businesses and industrial facilities in Cyprus can significantly reduce their electricity costs by installing on-site photovoltaic parks. These solar parks generate clean energy, allowing companies to become ...

Explore the future of BESS and large-scale solar parks in Cyprus--powered by EU support and smarter energy storage.

A 100-megawatt solar park will be built in the Limassol area, within the administrative boundaries of the villages of Vasa, Kellakiou, Asgata, and Sanida. French energy company TotalEnergies will ...

As part of our ongoing commitment to sustainable development, the Group is spearheading the creation of a photovoltaic solar energy park in Monagrouli, Limassol, Cyprus on behalf of an international ...

After mining activities ceased in 1979, a vast area of land remained unused. A Cypriot company with growing interests in the renewable energy sector is planning to transform the crater of ...

Plans for three large solar photovoltaic (PV) and battery storage parks in the community of Agios Theodoros, Larnaca, have entered a public consultation phase, sparking a debate among ...

According to official correspondence, the Agriculture Department explicitly recommended rejection of the original photovoltaic park design and alternatively proposed installing an agrivoltaic ...

We pre-construct and validate the final design of the photovoltaic park. Thanks to our highly trained professionals, we select equipment and materials. We present the final EPC proposal and proceed to ...

Learn how to de-risk your investment by choosing the right site for a solar module factory in Cyprus. This case study covers infrastructure, logistics, and costs.

A large-scale photovoltaic park will appear in the capital of Cyprus, converting solar energy into electricity with the help of special panels. The Department of Environmental Protection recently ...
