

Does the mobile base station use cluster communication

In GSM, one cell can span multiple carriers but use a single broadcast control channel (BCCH), so multiple carriers together provide the cell service. In WCDMA and LTE, carriers have ...

Clustering in WSNs is the most reliable solution for the challenges, in which nodes are grouped into few clusters, and a cluster head (CH) is selected for data aggregation and data transfer ...

In practice, the transmitters of competing cellular providers are often a significant source of out-of-band interference, since competitors locate their base stations in close proximity to one another to provide ...

It is observed that use of an additional mobile base station could greatly increase the quality of communication by providing uniform distribution of node traffic and interference across the clusters in ...

In professional two-way radio systems, a base station is used to maintain contact with a dispatch fleet of hand-held or mobile radios, and/or to activate one-way paging receivers. The base station is one end ...

In this study, we developed a stochastic model to analyse the information and communication interaction between a base station and a set of subscribers in a 5G cluster with ...

If we select the shape of a cell as a circle then the area between the two circles will not get covered by the base station and any attempt of communication from that area will fail.

Abstract: In this paper, we propose an (SAPSO) Self-Adaptive Particle Swarm Optimization algorithm to solve the base station positioning problem. This algorithm is used to minimize the distance between ...

The proposed scheme is implemented using OPNET 14.5, where each mobile node is having common base station and connected to the backbone network through IP cloud.

Unlike base stations, which deal with direct communications between mobile devices and towers, Mobile Switching Centers (MSCs) oversee the routing of calls and data over various cellular ...

Does the mobile base station use cluster communication
