

How much solar power does the EU have?

The combined installed capacity in the EU now amounts to 263 GW. The energy crisis triggered by the conflict in Ukraine led to a boom for the solar industry. EU Members States and the European Commission have finally recognized the importance of solar energy as a clean and strategic power source and have scaled up their ambitions for PV deployment.

What percentage of European electricity comes from solar energy?

In 2024, 47.5% of the electricity consumed in the EU came from renewables and 23.4% of renewable electricity came from solar energy (Eurostat, January 2026). June 2025 was the first month in history where solar energy was the main source of electricity generated in the EU at 22%. Source: SolarPower Europe

Does the EU solar sector continue to grow?

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights record installations, policy momentum, and the technology's central role in the continent's clean energy transition. Source: eepowerschool.com

How much solar power does the EU have in 2025?

Source: SolarPower Europe The EU solar generation capacity keeps increasing and reached, according to SolarPower Europe, an estimated 406 GW in 2025. The EU has long been a front-runner in the roll-out of solar energy. Under the European Green Deal and the REPowerEU plan, solar power is a building block of the EU's transition to cleaner energy.
