

Discover how U.S. battery storage capacity has experienced exponential growth since 2021, poised to surge by an impressive 89% by the close of 2024, provided developers execute their ...

Mark February 18 on your calendar to celebrate the humble battery that powers so much of our world. By appreciating and learning more about battery technology, we take a small step ...

After all, an EV battery pack stores enough energy to power the average home for a day, which could serve as an important backup source in the event of a power outage.

With a goal of more than doubling the energy output per mass compared to existing batteries, PNNL leads national programs like the Battery500 Consortium to improve energy storage for electric vehicles.

With Energy Storage rising to the forefront of industry developments, World Energy Storage Day is commemorated on 23rd September every year by various global industry stakeholders, policy ...

The 7th World Energy Storage Day (WESD) Global Conference & Virtual Expo, 22nd September 2023 and is a virtual, 24-hour marathon conference covering 100+ countries including ...

National Battery Day falls on February 18 to mark the birthday of Alessandro Volta, the Italian physicist and chemist who invented the electric battery in 1745.

National Battery Day, observed annually on February 18, is dedicated to recognizing the importance of batteries in our daily lives. From powering smartphones and laptops to running electric ...

More than 230 energy researchers and industry participants convened to discuss and advance energy storage technologies via lightning talks, panel discussions, student poster sessions, ...
