

What is the International Energy Agency's electricity 2025?

The International Energy Agency's Electricity 2025 provides a deep and comprehensive analysis of all these trends as well as recent policy developments. For the period 2025 through 2027, it forecasts electricity demand, supply and carbon dioxide (CO<sub>2</sub>) emissions for select countries, by region and worldwide.

What will Africa's electricity demand look like in 2024-26?

Our forecast for Africa for the 2024-26 period anticipates average annual growth in total electricity demand of 4%, double the mean growth rate observed between 2017 and 2023. Two-thirds of this growth in demand is set to be met by expanding renewables, with the remainder covered mostly by natural gas.

How much will France's electricity demand grow in 2026?

Electricity demand is set to grow by an annual average of 2.6% over the outlook period, recovering to pre-crisis levels only by 2026. Average annual total generation growth of 4% should ensure a strengthening export margin for the French market over the coming years.

Why is the global electricity market undergoing a major transformation?

The global electricity market is undergoing a major transformation, driven by rising demand, clean energy expansion, and infrastructure challenges. As the demand of power for electric vehicles, data centers, and global industries fuels electricity use, countries like China, the U.S., and India lead global growth.
