What is a 20kW Solar System?

Achieve energy independence with our 20kW solar systems. Generating approximately 2,000 to 3,000 kWh of AC power a month, 20kW solar systems are ideal for large households with several EVs and huge energy demands. Choose from a selection of grid-tie and off-grid 20kW solar systems, or get in touch with our experts for a custom system!

What appliances can a 20kW Solar System power?

A 20kW solar system has the capacity to power a variety of household appliances, making it a robust choice for energy independence. Here are examples of appliances that a 20kW solar system can typically power:

Lights: Light up a larger home with numerous energy-efficient bulbs.

Can a 20 kW solar system power a house?

A 20kW solar energy system can enable you to power your home autonomously. However, you will need solar batteries to store excess energy during periods when sunlight is limited or absent, like at night or on cloudy days. How much space will the solar panels take on my roof or ground?

How many solar panels does a 20 kilowatt solar system need?

The number of solar panels required to generate 20 kilowatts of energy hinges on the efficiency of your panels. Typically, you would need about 55 to 60 standard efficiency panels, but GoGreenSolar solar kits include higher efficiency panels that can get the job done with as few as 50 panels. Do you need battery storage for a 20kW solar system?
