What is a submersible solar water pump?

Submersible solar water pump - These are installed underground, but the solar panels are connected above ground. The pumps are used to move water from inside wells to the surface. SunFire Solutions also provides solar pumps for ponds, water features and more smaller projects. Find the perfect solar pump for sale that work for your needs.

What is a solar water pump?

The solar water pump is typically used in domestic water supply, irrigation projects and for pumping water. A solar water pump uses the energy of the sun. The electricity is provided by one or more PV panels which are connected to the electrical pump system. Solar pumps are a great alternative to the conventional method of pumping water.
