

Should you install solar panels in your garden?

Installing solar panels in your garden can reduce electricity costs, lower your carbon footprint, and extend the usability of your outdoor space after dark. This step-by-step guide will walk you through everything you need to know about installing solar panels for garden use, from planning to maintenance. [Why Install Solar Panels in Your Garden?](#)

How much do garden solar panels cost?

Garden solar panels function like traditional solar panels but are ground-mounted instead of roof-mounted and placed in your garden. They are typically more expensive than regular solar panels, costing approximately £11,700 for a 4kW system, but can help you save £1,304 annually on electricity costs.

How many solar panels do you need for a garden?

For a garden spanning 15-20 square meters, you can typically accommodate one to three ground-mounted panels. To power a standard three-bedroom house, you would need approximately 10 ground-mounted solar panels, requiring a garden space of at least 50 square meters.

How do I choose the best solar panels for my Garden?

The choice of solar panels depends on your garden's needs and aesthetics. Consider factors such as available space, intended use (e.g., lighting, water features), and design preferences when selecting the appropriate type of solar panels.
