

What is a containerized generator set?

() On a regular basis, containerized generator sets (CGS) are placed onboard ships to provide replacement power in case of damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers.

What are containerized generator / packaged container and enclosure options?

Containerized generator / Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets, balance of plant equipment, and switchgear.

How do you install a generator on a building?

Contract a crane company to unload and position the generator. Use the gantry to place the generator set onto the pad. Cooling Air - Louvers installed on the building's exterior connected to the generator's radiator/aftercooler. Fuel System - Proper fuel line connections and transfer pump setup.

How do you install a generator set on a concrete pad?

Use a lifting device to safely lift and place the generator set level on the concrete pad. Ensure the crane has the capacity to place the generator set on the pad. Connect the generator set to a lifting device and crane. Move and align the generator set with the concrete mounting studs. Install attaching hardware (washer, lock washer, nut).

The design of generator container configurations involves a comprehensive consideration of various factors. Beyond the power requirements of the generator set itself, the unique conditions of the ...

Explore diesel generator containers: weatherproof, portable power solutions for industries. Learn specs, installation & applications.

4000/5000Lt. tank space-optimized for containers External refuelling with signal lamp for Container External refuelling with analogue level indicator Fuel connections with 3-way valve & quick couplings ...
