

Europe's largest vanadium redox flow battery at the Fraunhofer Institute for Chemical Technology (ICT) in Pfinztal, Germany, entered controlled test operation and successfully demonstrated the on-demand ...

Our flow battery is non-flammable, contains no critical raw materials, is extremely durable and is easily scalable. It is uncomplicated to operate and can be easily integrated into existing energy infrastructures ...

Fraunhofer Institute for Chemical Technology (ICT) has commissioned Europe's largest vanadium redox flow battery, a 2 MW/20 MWh pilot facility in Germany.

The institute noted the modular vanadium redox flow battery was developed and built with German components and knowhow. It serves as an R&D platform for testing new storage technology and ...

Leaders from FBE and the private equity-backed FlexBase Group met in Laufenburg, Switzerland to mark the launch. The flow battery system, on a 20,000 m² site, will be able to store energy for hours or ...

Successful start to test operation at Fraunhofer ICT: renewable energy stored in a large-scale battery is introduced into the power grid on demand.

Jena Flow Batteries is your partner for industrial energy storage solutions. Our resource-efficient, metal-free flow batteries enable safe and sustainable energy storage, advancing Europe's energy transition.

Flow Batteries Europe is working to create and reinforce networks between key stakeholders in the flow battery industry. Become a member of Flow Batteries Europe and play an active role shaping a long-term strategy ...

Construction work for the world's largest flow battery started last month at the strategic critical electrical grid interconnection point on the borders of Germany, France, and Switzerland.

Explore Germany's leadership in the flow battery market, supported by renewable energy goals, government investments, and AI-driven optimizations. Learn about innovative energy storage solutions and ...
