

To promote global energy transformation, Goldwind has thoroughly integrated renewable energy and digital technology. We are actively building zero-carbon solutions for new power system, ...

February 22 (SeeNews) - Chinese wind turbine maker Xinjiang Goldwind Science & Technology (HKG:2208) said Thursday it has hooked to the grid a wind-photovoltaic (PV) complementary smart ...

Goldwind's core business resides in three areas with eight brand units - wind power solutions, internet of energy, and environmental protection. The application of smart sensors provides comprehensive ...

It is a new ecological energy system with high integration of energy and information, achieving horizontal multiple energy compensation and vertical coordination with DERs, utility grid, loads and energy ...

Based on our insights into and understanding of smart energy, we strive to connect energy activities via digitalization technologies, to improve efficiency and cost while reducing carbon emissions during the ...

Goldwind's Dafeng microgrid project in Jiangsu has an annual generation capacity of about 4.33 million kWh, equivalent to the domestic power consumption of 2,000 homes for a year. This project reduces ...

Goldwind Technology has partnered with Pacific Energy, a leading renewable energy company in Australia, to successfully deliver the wind turbines for the Tropicana project, leveraging their deep ...

Goldwind is leveraging its expertise in wind turbines to develop microgrid solutions using renewable energy sources like wind and solar, along with energy storage technologies. It has installed ...

In the first renewable energy carbon-neutral park in China, the Goldwind Technology Smart Park, the concept of "zero carbon" is apparent. The park integrated functions such as renewable energy, ...

Management Storage Sources Energy control system of the smart micro grid Integrate and maximise the proportion of renewable energy power generation Coordinate island and the grid-connected ...
