

Who is funding the energy storage Awards?

The Winners Are Set to Be Announced for the Energy Storage Awards! The grants will be funded by the EU's Emissions Trading System. Image: CC. The EU has today (23 November) launched a grant funding opportunity worth EUR4 billion (US\$4.4 billion) for upstream and downstream clean energy projects, including energy storage.

Why should we invest in energy storage?

By providing low-cost funding for breakthrough storage solutions, we help bring clean electricity to millions of people when they need it. The rapid expansion in intermittent sources of clean energy such as wind and solar power must be matched by investments in energy storage to ensure communities get electricity when they need it most.

What does a solar energy fund invest in?

In addition to renewable energy producers and enablers, the fund invests in energy efficiency and management, exemplified by third-largest holding ON Semiconductor ON (7.3% of assets), and in EVs, with Tesla TSLA (6.4%), which ranks fourth.

Should you invest in a green energy ETF?

An ETF reduces the risk of being right on the thesis but picking the wrong stock. Image source: Getty Images. Many ETFs focus on clean energy these days, given the amount of money flowing into the sector. Some take a broad approach by investing across the entire industry, while others focus on a single aspect of green energy investing.
