Grid tie inverters are DC-AC power inverters which, like Pure Sine Wave Inverters, convert the redundant DC power from solar panels into the AC power household appliances run on. ...

OverviewOperationPayment for injected powerTypesDatashetsExternal linksGrid-tie inverters convert DC electrical power into AC power suitable for injecting into the electric utility company grid. The grid tie inverter (GTI) must match the phase of the grid and maintain the output voltage slightly higher than the grid voltage at any instant. A high-quality modern grid-tie inverter has a fixed unity power factor, which means its output voltage and current are perfectly lined up, and its phase angle is within 1° of the AC power grid. The inverter has an internal computer that senses the current ...
