

FuturEnergy Ireland, a joint venture between Coillte and ESB, has been granted planning permission to build Europe's first iron-air battery facility, a new technology that promises to store...

FAQs: Energy storage systems in Ireland What is the battery energy storage system? A battery energy storage system captures electricity from the grid or renewable sources, stores it in ...

The Poolbeg Battery Energy Storage System in Dublin went into operation in November 2023 and has the capability of providing 75MW of fast-acting energy storage. Could new energy storage solutions ...

As of 2025, there are three operational interconnectors from both the Republic of Ireland and Northern Ireland to Great Britain, providing an interconnector capacity of 1,500 MW.

Powering Ireland's Critical Infrastructure TSG Power can provide HV connections across a diverse portfolio of Irish infrastructure projects. Whether supporting electrification, automation or electric ...

EirGrid, the transmission system operator (TSO) for the Republic of Ireland, has launched a consultation outlining how it will procure its first long-duration energy storage (LDES) capacity.

Housed in a standard 10-foot ISO container and powered by repurposed second-life batteries, the Charge Qube offers a versatile solution for fleet depots, logistics hubs, construction ...

While Ireland currently relies primarily on battery storage and the Turlough Hill Power Station in County Wicklow, new technologies are emerging that could play a key role in the future.

This document is the Construction and Environmental Management Plan (CEMP) for a proposed Long Duration Energy Storage (LDES) Facility near Buncrana, Co. Donegal.

SolarEast BESS's high-voltage ESS systems are specifically designed for commercial users who need scalable, safe, and high-density energy storage--from 50kWh to multi-megawatt ...
