

What types of circuit breakers are used in Australia?

C curve breakers are the most common type used in Australian installations. D-Curve Circuit Breakers: D-curve breakers are designed to handle high inrush currents and trip when the current reaches 10-20 times the rated current. They are often used for highly inductive loads, such as transformers or motors with significant startup current.

What are the different types of circuit breakers?

Single-phase, double-phase, and three-phase circuit breakers play vital roles in protecting electrical circuits. Single pole circuit breakers, commonly known as 1 pole breakers, are often used in residential, commercial and industrial applications.

What is a single pole circuit breaker?

Single pole circuit breakers, commonly known as 1 pole breakers, are often used in residential, commercial and industrial applications. They are designed to interrupt the power in one live wire and are suitable for protecting 230V AC circuits. Common applications: Lighting circuits, power outlets, small appliances
