

# Homemade solar power generation for butter barrel

What is a DIY portable solar generator?

More About opengreenenergy &#187; A DIY portable solar generator is an excellent project for individuals who want to harness the power of the sun while also having a reliable source of electricity on the go. You can easily make your portable solar generator with a little knowledge and some basic tools.

How to make a solar generator?

You can change the size and volume of the battery bank, the number of solar panels, and even add extra ports/outlets as per your own needs. You will need a Solar panel, a charge controller, a battery bank, and an inverter to make a generator. The solar panels turn sunshine into power, which is subsequently stored in the battery bank.

How much does a DIY solar generator cost?

So let's talk about what the main components may set you back. Building a DIY solar generator may cost you anywhere between \$1,600 and \$2,400. The main variable is the battery type. If you're on a budget, by all means, go with a good-old lead-acid battery. Finally, before you start, make sure to create a DIY solar generator wiring diagram.

What is a DIY solar generator kit?

This DIY solar generator kit includes two 100W solar panels, one 30A charge controller, and a solar adaptor kit together with all the cables and connectors you need. The panels that come with this kit have corrosion-free aluminum frames, so you can use them outdoors for extended periods.
