

Max output power : 4000W Features: Huawei r4875g5 is a high ...

A: We are a professional supplier of Huawei, Emerson and ZTE power supply modules, embedded power systems and rectifier modules with original packaging and technical service to provide ...

Dissipates heat using its built-in fans. Converts 110 V AC or 220 V AC power into -48 V DC and adjusts the output voltage. Provides protection against overcurrent, overvoltage, and overtemperature for its ...

Huawei R4875G5 Rectifier Module is a digital rectifier with high efficiency and high power density. The unit supports a wide input voltage range and provides 53.5v DC default output voltage.

The Huawei 4875 series power module (such as R4875G1) is an efficient and high-power density communication rectifier module launched by Huawei, designed specifically for modern ...

Max output power : 4000W Features: Huawei r4875g5 is a high efficiency, high power density digital integrated circuit Flow module, supporting 85V AC ~ 300V AC input, 53.5v/57v DC default output. It ...

High-performance power rectifier module for all your electronic needs. Upgrade to the R4875G1 to experience next-level power.

R4875G1 is a 4000W, 97% efficiency, digital controlled high power density rectifier. It converts input voltage ranges between 85 to 300 Vac into 42 to 58 Vdc adjustable output voltage.

The Huawei R4875G stands out with its high power density, superior efficiency, and strong digital control features. Its wide input flexibility and stable output make it ideal in modern telecom environments ...

R4875G1 is a 97% efficient digital rectifier module that converts 85-300V AC input to 53.5V DC output at 4000W with high power density. It has advantages such as soft start, hot plug, input/output ...

Through our strong relationships with manufacturers and efficient supply chain management, we are able to negotiate favorable pricing. This allows us to pass on cost savings to our customers and ...
