

HUST is renowned for both its advanced research facilities and its academic achievements. HUST is the only university in China that manages four National Laboratory / National Science Centers.

Moving forward on the path of corporate development, Yuneng Magic Cube will continue to spark innovative energy, uphold its entrepreneurial spirit, and achieve even greater success!

The urgent demands for sustainable and renewable energy resources facilitate the researches of energy storage devices, and the electrode materials are important to the performance of these...

Market demand for emerging energy storage technologies is driving the emergence of new electrode materials and electrolyte systems, the continuous discovery of new electrochemical ...

Address: 1037 Luoyu Road, Wuhan, Hubei, China; P.C: 430074 Tel: +86-27-87543676 Email: hansy@hust.cn ©2017 Huazhong University of Science and Technology

As an important part of scientific research projects, Yinlong energy cabinet took the lead into Huazhong University of Science and Technology, officially became the new member in the "Double First-Class" ...

The composition and structure of electrode materials are key scientific issues that restrict the energy/power density, cycle life, and safety and stability of electrochemical energy storage systems.

On April 11, the storage innovation joint laboratory jointly established by New H3C Group, a subsidiary of Tsinghua Unigroup, and Huazhong University of Science and Technology was officially unveiled.

Address: Clean Energy Building, Huazhong University of Science and Technology, Luoyu Road 1037, Wuhan, Hubei Province, P. R. China Tel: 027-87542418 Fax: 027-87540724 Postcode: 430074

Then she focused on the investigation of advanced energy storage materials (carbon-based anodes, redox-active polymers) and novel energy storage devices for large-scale energy storage applications ...
