

Are outdoor electrical systems safe?

From outdoor lighting and security systems to pools, spas, and garden tools, we rely on electricity to enhance our time spent outdoors. However, outdoor electrical systems come with their own set of safety risks, especially when exposed to the elements.

Why are outdoor electrical systems important?

With the increasing popularity of outdoor living spaces, electrical systems outside the home are more important than ever. From outdoor lighting and security systems to pools, spas, and garden tools, we rely on electricity to enhance our time spent outdoors.

Are indoor plugs safe to use outside?

Indoor plugs in general aren't generally made for the outdoors, and sunlight exposure will make the materials brittle, causing them to crack and expose those dangerous live wires over time. So make sure to get an outlet made for the outdoors.

Do outdoor electrical systems need to be inspected?

For example, pool lights and pumps need to be regularly inspected to ensure they are properly grounded and operating safely. At Thomas Edison Electric, we specialize in outdoor electrical safety and can help ensure your home's outdoor electrical systems are up to code and safe to use.
