

Explore top wind energy companies like Pattern Energy and Apex Clean Energy that are shaping the future of renewable energy in the US.

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

Texas widened its lead as the country's renewable energy leader in 2024, with growth in solar and wind power, according to federal data.

Net additions of global top owners' wind and solar assets reached a record high of 113 GW by Jan. 1, 2023, marking a 28% growth from the previous year. Collectively, global top 30 asset ...

Solar has become the largest renewable source of installed power capacity in the United States, surpassing wind after 27 consecutive months as the leading source of new grid additions, ...

Here are the top eleven countries using renewables--wind, electricity, geothermals--to lead the way to a low-carbon, zero emissions future.

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find ...

The top wind power companies supporting and developing renewable energy projects globally include Siemens, NextEra Energy, GE Vernova and Enel

These are the 10 biggest renewable energy companies by 12-month trailing (TTM) revenue. Some companies outside of the U.S. report profits semi-annually, so the 12-month trailing ...

The top renewable energy companies in the USA are developing some of the major renewable power projects in 2025 which will boost the solar & wind power generation.
