

What is an off-grid solar power system?

Off-grid solar power systems are useful for remote places with no access to electrical points. They're also paired with generator sets, with the solar power system supplying electricity during the day while the generator set takes over at night (hybrid system). Hybrid systems are popular at islands or beaches too. Off-grid solar.

Do you offer a full off-grid solar power system package?

Off-grid homes. For homes to go off the grid and depend on their own sustainable generation of electricity, we offer full off-grid solar power system packages to cover your home's electrical usage. We will assist you to calculate how much energy your home consumes for our solar engineers to find the right solar power system for you.

Can off-grid solar be used on remote islands?

While at remote islands with no access to the grid, off-grid solar is sometimes paired with a diesel generator to create a "hybrid" system that can help reduce intermittent power cuts and stabilise power around the island. We'd like to draw your attention to some of the best use cases for off-grid solar below: Off-grid homes.
