

The 3 megawatt storage system provides a more reliable and efficient energy supply and usage for the stadium, its visitors, neighbors and the Dutch energy grid.

Ore Energy, a Netherlands-based energy storage startup, has connected an iron-air battery system to the electric grid in Delft. The installation is reported to be the first grid-connected, fully operational ...

Today the largest European energy storage system using second-life and new electric vehicle batteries in a commercial building was made live.

With 43% of the Netherlands' renewable energy projects concentrated in North Holland, industrial battery storage systems are no longer optional; they're the backbone of sustainable progress. Let's unpack how ...

This technology strategy assessment on flow batteries, released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic initiative.

With global renewable energy capacity growing 15% annually (IEA 2023 Report), the EK Group Energy Storage Power Station emerges as a game-changer. Imagine having a giant "energy bank" that stores solar power ...

Located in the Westhaven of Amsterdam, the new battery installation--named Giraffe--is the largest in the city, with a power capacity of 10 MW and an energy storage capacity of 47 MWh. With Giraffe, ...

Dutch energy storage developer Giga Storage BV on Monday announced plans for a 10-MW/45-MWh battery energy storage system (BESS) project in the port area of Amsterdam, the Netherlands.

EK POWER specializes in high-efficiency energy storage batteries, solar storage containers, and microgrid systems, providing scalable solutions for industrial, commercial, and off-grid applications.
