

Do portable power stations have a weather rating?

However, other portable power stations do not have a weather rating, so it's important to check if you plan on using your power station outdoors. Regardless, it's a good idea to protect your power station from any water or severe weather conditions as much as possible.

How do I choose a portable power station?

A portable power station's maximum output tells you the total watts it can produce, which determines what you can and can't power with it. Look for a power station that can handle the combined wattage of the electronics you plan to plug into it.

How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO4 battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePO4 power stations will last for more than 3,000 charge cycles, or about 10 years.

Why do you need a portable power station?

Why Trust Us? Portable power stations are handy for backup power during outages, off-grid electricity for an RV, or simply charging your laptop and phone while working remotely. They're effectively large bundles of rechargeable lithium-ion batteries, which provide a quiet, exhaust-free alternative to noisy gas-powered portable generators.

From compact 512-Wh units to massive 2048-Wh ones with optional expansion batteries large enough to power your home, we've rounded up the best portable power stations on the market.
