

In addition to network management, this access point is also ...

Tri-radio WiFi 5 AP with 12 spatial streams and a selectable beamforming antenna, designed for high-density applications at large venues.

Advanced Connectivity: Features a quad-radio 802.11ac Wave 2 access point for robust wireless performance.
Integrated Security: Includes a dedicated security and monitoring radio for site ...

Expand your 10-Gigabit network with the Ubiquiti Networks Unified XG quad-radio 802.11AC Wave 2 access point with security radio. It features the Wi-Fi 802.11AC Wave 2 MU MIMO technology ...

With an integrated product design, the AP has built-in feeder lightning protector, Ethernet lightning protector, power lightning protector, power module, O/E converter, and other components.

The TP-LINK Outdoor Wireless Base Station pairs professional performance with user-friendly design, making it the perfect solution for both business and home users.

The Ubiquiti UniFi IP67 Wi-Fi Base StationXG enables the system integrator to effectively and efficiently create wireless network designs of any size, from small to large, with the potential for unlimited ...

Use the RF environment functionality of the UniFi WiFi BaseStation XG to detect and troubleshoot nearby interference, analyze radio frequencies, choose optimal AP placement, and configure settings.

A compact outdoor Wi-Fi 6 CPE with a powerful 16 dBi antenna, AP mode, and multiple mounting options - perfect for masts, poles, or rooftop deployments.

In addition to network management, this access point is also designed to mitigate security risks, as it continuously monitors the network for malicious activity as well as determines the best ...

The World's Highest Capacity Wi-Fi AP 802.11AC Wave2 Super-Capacity Indoor/Outdoor Quad-Radio WiFi Basestation with RF Channel Filtering and Directional Beam Shaping Antenna Technology.
