

Resort uses 10MW Jamaican energy storage container

We're proud that our liquefied natural gas (LNG) facilities in Jamaica are connecting our customers to a whole new world of affordable energy and making a real difference in people's lives.

Sunset Reef Resort activated its Sustainable Energy Storage System. This is the first resort to activate an energy storage system in the entire Caribbean region.

Whether you need residential photovoltaic storage, commercial BESS systems, industrial energy storage, mobile power containers, or utility-scale photovoltaic projects, WALMER ENERGY has the ...

Having identified these key challenges in the energy transition, I point to potential directions for change. These recommendations are drawn from our short experience in Jamaica and ...

About ten years ago, one resort in the Caribbean installed a 1.8 MW system with us. That system met 100 percent of the resort's electric demand, cut their grid costs in half, and kept...

Under this project, the NWC will utilise 100 per cent of its energy needs at the Mona Treatment Plant complex. This will result in savings at today's energy cost of approximately \$35m ...

The system was engineered to allow addition of energy storage without significant business interruption should that option become more cost effective. The PV is interconnected across three metered ...

One recommended option for Jamaican enterprises is the 215kWh Commercial Solar Battery. This modular system is designed for medium to large facilities such as resorts, logistics centers, and ...

This is expected to reduce the resort's greenhouse gas emissions by more than 1,000 tons annually making it one of the greenest hotels in Jamaica. In addition, the project will yield ...

Jamaica is advancing toward energy self-sufficiency by investing in renewable energy, offering incentives and encouraging public-private partnerships; some of which are outlined below.
