

Schematic diagram of the smart energy storage toothbrush system

The Smart Energy Storage System is aimed to adapt and utilize different kinds of Lithium-ion batteries, so as to provide a reliable power source. To promote sustainability and environmental protection, the ...

The Electric Toothbrush Reference Design demonstrates a simple, high performance and cost effective way to design an electric toothbrush or similar portable device.

With the rapid development of new energy power generation, clean energy and other industries, energy storage has become an indispensable key link in the development of power industry, and the ...

This project guides on the use of the SLG47513 to implement an electric toothbrush.

In addition to the 2-minute timer, this toothbrush also contains a 30-second timer based on a CNT3, which signals the need to proceed with brushing the next quadrant (quarter) of the oral ...

In this research, a low-cost toothbrushing monitoring system of brushing regions and brushing force using multimodal sensors and Unity is proposed for toothbrushing quality monitoring.

The ESP-Toothbrush is a smart electric toothbrush powered by the ESP32-C2 chip from Espressif. It features a 0.96-inch LCD display with an SPI interface, displaying important information ...

in this video i explained about the smart electric toothbrush and its domain based components & block diagram #smartelectrictoothbrush...more.

The main control circuit (1) in the electric toothbrush smart control circuit consists of a chip (DA14580) and an electronic component which is connected and matched to operate. The control...

ESP-Toothbrush is a smart electric toothbrush driven by Espressif Technology's ESP32-C2 chip. The toothbrush body integrates a 0.96-inch LCD display to display information such as ...
