

Solar-powered generators are changing lives in Senegal. Learn about the impact and how you can support this initiative today.

For basic energy needs, these households mainly rely on fuelwood for cooking, and kerosene lamps for lighting. This is expensive and causes health and environmental hazards. This ...

The Senegalese government is committed to supporting the renewable energy sector and rural electrification in the country and officially recognized off-grid solar as an ideal solution, demonstrated ...

Funded by the World Bank, this three-year initiative will provide clean, affordable energy to rural communities in the Fatick region, with a focus on areas like Ngayokh and Diakhao.

Senegal has launched a new solar electrification initiative aimed at extending clean and reliable energy access to more than 30,000 people in remote parts of the country.

The government's ASER300 project is bringing electricity to 300 villages all around the Senegal with mini-grids, which include PV modules, inverters, batteries, and cooling systems.

Access to finance for solar PV and wind projects in Senegal is relatively available, though high payment risk - particularly payment delays that affect projects' operating cash flows - and transmission ...

With over 3,000 hours of annual sunshine, Senegal has one of Africa's highest solar potential rates. Yet, only 23% of rural households have access to reliable electricity.

In many areas of Senegal, local communities still live without access to electricity. The few solutions often rely on unsustainable energy sources. The Senegalese Rural Electrification Agency (ASER) ...

At Solarvance, we provide Sahel-adapted, salt-resistant solar systems designed for Senegal's diverse conditions. Whether powering a clinic in Tambacounda, a school in Kolda, or a hotel in Mbour, we ...
