

Slovakia air energy storage project launched

The Slovakian project will be the first of its kind in Europe, delivering gigawatt-hour-scale energy storage capacity to capture surplus electricity from VVB's hydropower stations and dispatch it ...

But hold onto your solar panels: this Central European nation is rolling out one of the most ambitious energy storage project portfolios for 2025, aiming to become a regional hub for renewable integration.

Echogen Power Systems and Westinghouse Electric Company have signed a Memorandum of Understanding with state-owned hydropower operator Vodohospodárstva Slovenska ...

Echogen, a pioneer in supercritical carbon dioxide (sCO₂)-based PTES technology, is collaborating with Westinghouse to deploy long duration energy storage (LDES) solutions worldwide.

Energy storage facility with a preliminary cumulative installed capacity of 70 MW. The final storage capacity, enabling a net annual electricity generation, will be approximately 45 GWh.

The proposed plant in Slovakia will be the first of its type in Europe and will be able to store energy on a gigawatt-hour scale. During peak demand, it will take excess electricity from VVB's hydropower ...

The Slovakian project will be the first of its kind in Europe, delivering gigawatt-hour-scale energy storage capacity to capture surplus electricity from VVB's hydropower stations and dispatch it ...

Echogen Power Systems is proud to announce that its strategic partner, Westinghouse Electric Company, has signed a Memorandum of Understanding (MoU) with Vodohospodárstva Slovenska ...

The European Commission has earmarked EUR2.1 million under the Connecting Europe Facility (CEF) for Energy to assess adding a battery energy storage system (up to 80 MW/160 MWh) ...

This system allows the investor not only to reduce the operating costs of energy, but also to create new opportunities for revenue generation through tariff optimization and active participation ...
