

What is SMUD's residential solarshares program?

SMUD's residential SolarShares program lets you enjoy all the benefits of solar without a solar system on your roof. SMUD has developed local solar generation resources that supply 100% clean solar energy to all program participants.

What is neighborhood solarshares & how does it work?

These credits directly offset the utility bills for each tenant and the building owner. Neighborhood SolarShares is a program for which SMUD partnered with a solar developer to complete a large-scale solar installation that provides power to the grid.

How does SMUD pay for solar panels?

If your solar panels make electricity you don't need right away, it gets sent to your neighbors by way of the wires outside your house. Under SMUD's Solar and Storage Rate, that electricity is purchased by the utility for \$0.074/kWh, no matter what time it is produced.

Can SMUD help people with low income living in multifamily housing?

SMUD offers a couple of other programs that can help people take advantage of solar--especially people with low incomes living in multifamily housing. These programs are Community Solar, Virtual Solar, and Neighborhood SolarShares. Here's a little bit about how each program works.
