

Sineng Electric has revealed that it has provided its string PCS MV stations for what it said is the world's largest sodium-ion BESS, and China's first 100 MWh-scale energy storage power...

The present work applies a bottom-up cost model for determining expected future price trends between lithium-ion (LIB) and sodium-ion batteries (SIB) and incorporates both storage ...

China's state-owned power generation enterprise Datang Group said on June 30 that it had connected to the grid a 50 MW/100 MWh project in Qianjiang, Hubei Province, making it the world's ...

The first phase of the world's largest sodium-ion battery energy storage system (BESS), in China, has come online.

Sodium-ion's debut in American grid storage marks a significant step forward, but widespread adoption is far from guaranteed. The technology shows promising advantages for ...

While some applications like energy storage have switched to LFP, until now sodium-ion batteries have not been produced at the same volume levels. The question is, why?

So, the big news in energy storage is that sodium-ion batteries are really starting to make waves. You...

Peak Energy's sodium-ion phosphate pyrophosphate (NFPP) battery storage system was unveiled in July and is now running at the Solar Technology Acceleration Center (SolarTac) in ...

This is currently the world's largest sodium-ion battery energy storage project and marks a new stage in the commercial operation of sodium-ion battery energy storage systems, Hina Battery ...

Under the terms of the phased agreement, Peak Energy will supply up to 4.75 GWh of its sodium-ion battery energy storage systems (ESS). These systems are slated for deployment across...
