

Researchers at the University of Vienna are in a bid to chase this dream by trying to capture the sun's energy and storing it in chemical compounds. A report on how this works and why ...

Over 80 per cent of Wien Energie's solar energy plants are on the roofs of buildings. However, other sites will also need to be used for photovoltaic expansion in order to achieve Vienna's climate goals.

Advancing Solar Thermal and Photovoltaic Solutions. The R&D department has been an integral part of SOLID for more than 25 years, laying the foundation for innovation and new developments in solar ...

Increasing shares of volatile energy sources such as solar and wind require intelligent system coordination in order to harness flexibility potential through sector coupling, load shifting and the use ...

Attend this hybrid event to explore the latest innovations in renewable energy technologies, energy storage solutions, and sustainable practices. Earn CPD points and publish your research in the ...

Green Energy Lab is a research initiative for sustainable energy solutions. With the core regions of Vienna, Lower Austria, Burgenland and Styria, Green Energy Lab has a test market of five ...

As the largest international conference for photovoltaic research, technologies, and applications, the EU PVSEC continues to be a key event for shaping the future of solar energy.

The EU PVSEC is the world's leading forum for PV Research and Development and the biggest Conference on PV Solar Energy worldwide. It covers a wide range of PV topics such as device ...

at the ACV Austria Center Vienna, marking the start of a pivotal week for the global solar energy sector. Running from 23 to 27 September 2024, this year's conference gathers leading scientists, industry ...

We support our clients with innovative research, development, and testing of solar cells, PV modules, and PV power plants to meet the highest quality and performance standards.
