

What is a photovoltaic facade?

This approach is especially relevant in urban environments and in projects where roof-mounted photovoltaic systems are limited or constrained. WHAT IS A PV FACADE? A photovoltaic facade, also referred to as a BIPV facade or active facade, is a building-integrated photovoltaic system in which photovoltaic glass replaces traditional facade cladding.

What is a PV facade?

A photovoltaic facade, also referred to as a BIPV facade or active facade, is a building-integrated photovoltaic system in which photovoltaic glass replaces traditional facade cladding. Unlike add-on photovoltaic installations, a BIPV facade is designed as part of the building construction from the outset.

Why should you choose a solar facade?

Our innovative solar facades simultaneously provide free electricity and beautiful cladding for new or refurbishment projects. We ensure durability and resilience by giving you unparalleled design freedom with proven technologies.

What is a ventilated solar facade?

The ventilating layer further more helps to lower the thermal load of the building by up to 66%, whilst generating free and sustainable electricity. The ventilated solar facade allows fast and easy installation, inspection and reuse, on both new-builds and retrofits

Facade PRO Architectural solar facades, reimagined. Next-generation solar facade system engineered for performance and designed for beauty.

A photovoltaic facade integrates photovoltaic glass into the building envelope, allowing the facade to generate renewable electricity while performing its role as external cladding. By replacing ...

Schletter's solar mounting systems for facades are designed for a quick and hassle-free assembly process. With user-friendly design principles, installation becomes straightforward, saving you ...

The installation of solar systems on facades requires special fixing solutions to ensure stability and efficiency. With Eurotec's high quality facade mounting system, the solar substructure can be ...

A critical part of the facade installation of photovoltaic panels is choosing the right location and installation technique. Facade panels are mounted on a special structure, in a vertical ...

Introducing Solstex -- a building-integrated photovoltaic (BIPV) facade system designed to harness the power of the sun, withstand the harshest climates, and deliver unparalleled design ...

Innovative facade installation of solar modules with spacer mounting system and injection mortar.

Sustainable, safe and without damaging the insulation.

The Solarix facade mounting system has been specifically developed to simplify the challenges associated with installing solar panels on the facade, such as E-installation, weight and replacement. ...

Our innovative solar facades simultaneously provide free electricity and beautiful cladding for new or refurbishment projects. We ensure durability and resilience by giving you unparalleled design ...

PV mounting systems for the installation of solar modules on walls and facades. Safe & reliable.
