

The Vatican is now completely powered by a farm that sports solar panels to help shade-tolerant crops thrive. This new coupling of solar and agriculture is growing fast.

The Vatican is set to become the world's first carbon-neutral state through a groundbreaking initiative that involves transforming a 1,000-acre field north of Rome into a large solar ...

Vatican City's solar panels provide a significant portion of the energy needed for key buildings like the Paul VI Audience Hall, demonstrating a strong commitment to transitioning to renewable energy.

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican...

By installing solar panels in our 42 parish churches, the diocese will try to avoid 191 metric tons of carbon dioxide emissions over the next 25 years through the generation of solar power.

Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside...

The Holy See and the Italian Republic have signed an agreement to build an agrivoltaic plant in the Vatican's Santa Maria di Galeria area just outside of Rome, aiming to supply Vatican City ...

Prior to his death, Pope Francis worked to establish a solar installation for the small city-state. Now, the country is officially energy-independent, as the solar installation supports all of the ...

The world's smallest country just made a big move: Vatican City is now powered entirely by solar energy, setting an example for global climate action.

This dual-purpose system combines solar energy production with agricultural land use, allowing crops and solar panels to coexist on the same property. Vatican City joins Albania, Bhutan, ...
