

Solar Resource Maps and Data Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Solar Supply Curves View an ...

This over \$227 million New ERA investment will enable Inland Power and Light Company to procure over 273 megawatts of capacity of solar and wind generation to serve our members in rural areas of Washington and ...

The NSTTF contributed to the progression of CST and CSP technologies, from early steam-based solar receivers to molten salt heat transfer and storage media, to next-generation solid particle technologies, which unlock ...

See the locations of the major solar systems identified by this research on our interactive map.

Concentrating solar power (CSP) projects in United States are listed below alphabetical by project name. You can browse a project profile by clicking on the project name. You can also access information on CSP ...

We're building pilot projects at various locations that are designed to test different types of solar-related technology to further our knowledge of how this generation can be integrated into our electricity portfolio.

The USPVDB is a comprehensive dataset of U.S. large-scale solar PV energy project locations and characteristics that makes the data easier to access and more accurate than existing ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

This demonstration is the culmination of a \$100 million research effort to develop next-generation concentrating solar-thermal power (CSP) plants and showcase storage technology that could provide one ...

WASHINGTON, D.C. -- The U.S. Department of Energy (DOE) has selected NextEra Energy Resources Development, LLC, to enter realty negotiations for a carbon-pollution-free electricity generation ...
