

To achieve the optimal carbon peak and carbon neutrality targets for the power industry in China and Germany, we developed a system dynamics model to simulate the electricity production ...

China achieved a historic breakthrough in 2024 by installing an unprecedented volume of renewable energy capacity--equivalent to the entire national power grid of Germany in just one year.

Germany was a pioneer in the solar power industry, but succumbed to competition from China. Now, Germany -- and the European Union -- are trying to revitalize the industry once again.

It provides a general overview of the energy transitions in Germany and China and the recent developments in both countries. The report is published by GIZ in the framework of the Sino-German ...

The first of its kind, this study offers an overview of the photovoltaics and battery storage market in Germany. It provides the latest statistics on the PV market and battery storage systems, along with ...

China and European solar and storage leaders met in D&#252;sseldorf, Germany, this week to call for deeper cross-border cooperation as both regions confront record PV additions, rising storage...

From Germany's perspective, China is by far the most important country of origin of photovoltaic power stations. Roughly 87% of the photovoltaic power stations imported to Germany in ...

Industry leaders from China and Europe met in D&#252;sseldorf for the China-EU Solar & Energy Storage Industries Dialogue 2025, launching a bilateral storage cooperation platform and ...

In chapter 4 of this report, we selected and analyzed in detail 15 case studies for the application of energy storage systems, mostly in Germany.

LONGi is also leading the way in the promotion of the rooftop solar PV expansion. It has recently launched a WeChat mini programme, where users can obtain one-stop rooftop solar power services, ...
