

The selected projects range from large-scale battery systems to industrial thermal storage and new pumped-hydro plants, reflecting both the technological maturity of the sector and ...

Algeria, Austria, Germany, Italy, and Tunisia have signed a declaration to develop the Southern Hydrogen Corridor, a 3,500 km to 4,000 km project to transport hydrogen from North Africa to Europe

This publicly accessible tool allows users to explore projects by technology type, location, scale, and status-offering deep insights into how storage supports the EU's energy transition.

Whether it's grid-side storage in Germany, capacity market projects in the UK, or solar-plus-storage systems under construction in Southern Europe, the demand for battery container ...

Southern Europe is leading a renewable energy revolution, with countries like Spain, Italy, and Greece adopting cutting-edge energy storage systems. This article explores how advanced storage ...

Europe's energy storage sector is undergoing a major transformation, with a 130GW pipeline and a shift in leadership to utility Enel, driven by large-scale projects and institutional financing.

These markets were expected to be implemented in late 2025, or early 2026 but there has not been strong signalling yet. The bankability of BESS projects in Spain - similar to those in Italy - ...

Here Tamarindo's Energy Storage Report highlights those players that have been at the forefront of storage innovation in Italy, Germany, Spain, France and Ireland in recent months.

This section outlines key EU projects, initiatives, and market trends in energy storage, highlighting efforts to integrate renewables, enhance grid stability, and support the clean energy transition.

Amsterdam, September 30, 2025 - Sungrow, global leading PV inverter and energy storage system (ESS) provider, today announced the successful grid connection of the first 400MWh of ENGIE's ...
