

In the following short video, I take you on a tour of a 4G cell site in Stockholm, where there are antennas and radios for the 700-900 MHz, 1.8+2.1 GHz, and 2.6 GHz bands.

The project is funded by PTS and conducted in collaboration with Telia at one of Telia's mobile base stations. The installation of the new energy source will be followed by a test period of at ...

The new branch will have three new stations in Stockholm and Solna. This expansion enables new housing and provides more travel options to some of Stockholm's fastest-growing districts.

During recent years there is an on-going deployment of 5G base stations for radiofrequency [RF] communication in Sweden as well in many other countries. This is made without ...

The results demonstrate a significant improvement in detection accuracy, directly contributing to more efficient 5 G base station deployment in densely populated urban areas. ...

Setting a DAS to any other type will restore the main tower and delete the individual DAS elements. CellMapper is a crowd-sourced cellular tower and coverage mapping service.

Located at the heart of the city, Stockholm Central Station is Sweden's largest transportation hub.

Map type: local | Total track length: 463 miles | Center coordinate: 59.344, 18.0043 | \* Red Line 13 - Norsborg to Ropsten: (Metro/rapid transit, 25 stations) Norsborg, Hallunda, Alby, Fittja, ...

Travellers will be able to stop and take in the striking views across Riddarfjärden, an eastern bay in Lake Mälaren, Gamla Stan, Södermalm and Stockholm City Hall. It also leads into ...

During WTC2025 in Stockholm we'll be offering an array of technical tours around Stockholm to peak everyone's interest: from a giant traffic tunnel to a historic mine to novel urban development to ...
