

City, one of Stockholm's most recognizable department stores, has installed a rooftop solar system that supplies the building with locally generated renewable electricity.

The Sweden Solar System is the world's largest permanent scale model of the Solar System. The Sun is represented by Avicii Arena in Stockholm (still known by most as Globen), the largest hemispherical building in the world. The inner planets can also be found in Stockholm but the outer planets are situated northward in other cities along the Baltic Sea. The system was started by Nils Brenning, professor at the Royal Ins...
