

How many solar panels do I Need?

The number of solar panels you'll need for your home will vary based on factors specific to you, including the size of your home, energy needs, and location. However, the average home needs between 17 and 21 solar panels to completely offset utility bills.

How long do solar panels last?

Most panels feature 25 years of equipment warranty coverage, but a select few come with 20-year equipment coverage. Several models also come with a 25-year performance guarantee. These panels can last between 25 and 30 years or more on average. Like SunPower, REC has a certification program for its installers nationwide.

Why did Jimmy Carter install solar panels on the White House?

In 1979, President Jimmy Carter, after months of wrangling politically to bring about green energy awareness, installed thirty-two solar panels on the roof of the White House. At the time, the Carter Administration was in the midst of the Arab oil embargo, which had caused a shortage of fossil fuels in the United States.
