

Currently, the company is a developer and manufacturer of a full range of single- and double-axis solar trackers of 5 - 140 kW installed capacity. To date, there are more than five hundred trackers of over 7 ...

The HSAT HORIZON STR-111 tracker system automatically follows the Sun, adjusting the tilt angle of photovoltaic modules throughout the day. Its proprietary control algorithm increases ...

Our main focus is on solar trackers and advanced solutions for solar power plants. We are the exclusive supplier of tracker systems in Ukraine, enabling maximum efficiency in harnessing the sun's energy. ...

Company profile for Mounting System, Tracker manufacturer Ukrainian Systems Solar TOV - showing the company's contact details and products manufactured.

Our innovation is a single-axis tracker system that automatically rotates solar panels following the sun throughout the day. This keeps the panels constantly at the optimal angle to sunlight, increasing ...

The use of trackers in solar power is not new globally, but for Ukraine, this case marks a new chapter. Until now, most local stations were built on fixed structures, which simplified installation ...

Originally designed for mobile homes, the SolarTrackr overcomes a fundamental limitation of traditional static solar panels, tracking the sun's movement throughout the day and optimizing ...

Developed and manufactured entirely in Ukraine, the tracker is engineered to meet European quality standards and is supported locally, providing an alternative to imported systems.

Control systems consist of electromechanical drives, control unit and software. The solar radiation sensor, designed by "Ukrainian Systems Solar" LLC, is a miniature dual-axis tracker with a ...

The sTracker is a high efficiency, low maintenance, ground mount dual axis solar tracking system. Solar tracking directs solar panels at the sun all day long for maximum exposure.
