

Your All-in-One BESS Solution Optional MPPT, STS, ATS, and Charging Gun Integration Stars 96/144/192 kWh

A dual-purpose outdoor ESS that combines solar storage with integrated EV charging -- reducing costs, maximizing clean energy use, and powering vehicles day and night.

Discover our PV-ESS-charging integrated solution that combines energy storage, solar PV, and EV charging for cost-efficient, reliable, and scalable power. Ideal for corporate parks, malls, ...

Space-saving: using door-mounted embedded integrated air conditioners can save space in the cabinet by not occupying any space, improving the available space, enhancing the top structural integrity, ...

The PV+ESS+Charger Solution integrates the PV system and energy storage system (ESS) with a charger to charge vehicles, which also helps save electricity costs through peak and off-peak ...

The ELECOD Outdoor Cabinet ESS for PV Storage & Charging offers an integrated and scalable energy storage solution designed for photovoltaic energy generation and charging applications.

Smart integration features now allow multiple industrial systems to operate as coordinated energy networks, increasing cost savings by 30% through peak shaving and demand charge management.

All-in-one Design Integrated PV and storage system with super wide PV input voltage Small footprint and IP54 protecting grade for outdoor installation environment; Safe & Reliable High-performance ...

A comprehensive energy system that combines solar generation, energy storage, EV charging, and microgrid technology. Through intelligent energy coordination, it maximizes clean power usage, ...

The Ukrainian enterprise is specialized in the operation and management of smart electric vehicle charging infrastructure, as well as digital and IT-based solutions for charging networks.
